

Credo Wealth

Annual Best Execution Disclosure 2018

April 2019

This report has been prepared by Credo for the period ending 31 December 2018 for the purposes of meeting our regulatory obligations under Commission Delegated Regulation (EU) 2017/576 ("MiFID II"), which requires Credo to annually publish, for each class of financial instrument traded,

- the top five venues where we have executed client orders, and/or
- the top five firms to whom we have transmitted or placed client orders for execution.

This report also provides information on Credo's assessment of the quality of execution it obtained from these execution venues and/or firms, for each class of financial instrument. Where an asset class has not been traded during the reporting period, no data or analysis is shown. Credo Capital Plc trades as Agent on behalf of retail and professional clients (and does not deal as principal), the annual best execution tables have been produced for each classification of client. Further information on the execution process can be found in our Order Execution Policy [here](#).

Please note, information for the reporting period has been collated based on the regulatory obligations that applied to Credo during that time, which are different to those that apply now, namely MiFID II, and pursuant to which this report has been prepared. Consequently, there are certain sections in this report for which information required under MiFID II for the reporting period (i) was not available; (ii) was only partly available; or (iii) was available in a different format. As a result, this report has been prepared on a best efforts basis only. The assumptions and available information used to prepare this report may result in inconsistencies in information across asset classes presented herein or, in the case of aggressive/passive/directed orders, no data being presented, and therefore may not accurately reflect the trading activities undertaken by Credo in 2018. Please also note, the assumptions and methodologies used to produce this report may not be used for the preparation of future reports.

Top 5 Execution Venues and Counterparties

The top 5 execution venues and counterparties used by Credo Capital Plc for different asset classes of instrument are set out in the 'Annual Best Execution Disclosure Tables 2018'.

Credo Capital Plc trades as Agent on behalf of retail and professional clients (and does not deal as principal), the annual best execution tables have been produced for each classification of client.

The relevant execution information for each asset class has been split into two tables. Table 1 displays the top five **execution venues** ranked in terms of trading volumes and Table 2 displays the top five **executing brokers** ranked in terms of trading volumes.

The shares & depositary receipts asset class have been grouped by ESMA's 'Equity ticksize - MiFID Transitional Transparency Calculations'.

Execution Quality Analysis and Conclusion

We note below the information required to be provided under Article 3(3) of RTS 28 providing a summary of the analysis and conclusions drawn from Credo Capital Plc's monitoring of the quality of execution obtained on the execution venues or via a counterparty where all client orders have been executed during 2018.

Requirement under Article 3(3)	Credo Response
(a) an explanation of the relative importance the firm gave to the execution factors of price, costs, speed, likelihood of execution or any other consideration including qualitative factors when assessing the quality of execution;	Credo Capital Plc is required to ensure for the Relevant Period that the best possible result is obtained on a consistent basis when executing client orders and transmitting orders to third parties for execution. What constitutes the best possible result however varies depending on the specific execution factors relevant for each trade. We generally treat price and costs as the most important of these factors for obtaining the best possible result. However, the overall value to you of a particular order may be affected by other factors such as likelihood of execution, size, speed etc... In determining the relative importance of these factors, we will use reasonable judgment together with our understanding of the appropriate execution criteria for the specific order. For example, when transacting a large order, minimising market impact might be more important than price or, when trading an illiquid product, certainty of execution might be more important than price. We may therefore conclude that factors other than price and costs are more important in achieving the best possible result for you.
(b) a description of any close links, conflicts of interests, and common ownerships with respect to any execution venues used to execute orders;	Credo does not have any close links, conflicts of interests or common ownerships with respect to any execution venues used to execute orders.
(c) a description of any specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received;	Credo does not have any arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received.
(d) an explanation of the factors that led to a change in the list of execution venues listed in the firm's execution policy, if such a change occurred;	There are no changes to note in the list of execution venues listed in the firm's Execution Policy. Brokerage firms on our list of execution venues are subject to an initial authorisation and ongoing monitoring process, which includes, regular reviews of the performance of execution services provided by the broker, and the broker's ability to trade effectively on our clients' behalf.
(e) an explanation of how order execution differs according to client categorisation, where the firm treats categories of clients differently and where it may affect the order execution arrangements;	All Credo Capital Plc clients are treated on the same basis with regards to trade execution.

Requirement under Article 3(3)

Credo Response

(f) an explanation of whether other criteria were given precedence over immediate price and cost when executing retail client orders and how these other criteria were instrumental in delivering the best possible result in terms of the total consideration to the client;

In accordance with the FCA's client order handling rules, we are required to have procedures and arrangements in place that provide for the prompt, fair and expeditious execution of orders. Orders must be executed sequentially and promptly, unless this is impracticable given the characteristics of the order, market conditions or if the interests of the client require otherwise. We may combine your order with other clients. By combining your orders we must reasonably believe that this is unlikely to disadvantage any client and sufficient prior disclosure is therefore made in this Policy that the effect of aggregation may work to a client's disadvantage. As such, aggregation may result in you obtaining a less favourable price in relation to a particular order. Final allocation will be processed on a pro rata basis unless this is to the disadvantage of any client.

(g) an explanation of how the investment firm has used any data or tools relating to the quality of execution, including any data published under Delegated Regulation (EU) 2017/575 [RTS 27];

During 2018, Credo Capital Plc has regularly monitored the quality of execution obtained from the execution venues used to place client orders for execution. Credo Capital Plc is satisfied that it has adhered to the requirements set out in its Order Execution Policy in seeking to obtain best execution for its clients by reference to all relevant factors.

Each trade is monitored by the Dealing Team when placing the trade instruction to ensure that it is executed on the best terms available. It is a prerequisite of the terms of business of all brokers used by Credo Capital Plc that they must provide Credo Capital Plc clients with best execution. Brokers used by Credo Capital Plc are kept under constant review by the Head of Trading and new brokers can be added if they demonstrate an ability to access relevant liquidity (subject to satisfying Credo Capital Plc's on-boarding requirements).

From 2019 Credo Capital Plc will have access to an independent transaction cost analysis tool that allows it to record implementation shortfall, i.e. the price difference between when the trade was released and the price achieved for the client. This will be applicable to various trading strategies. Other benchmarks are also utilised to achieve a more complete picture. This allows Credo Capital Plc to rate counterparties' performance. Credo Capital Plc will use this together with other sources of information available to them on a regular basis to consider whether the brokers used have provided the best possible results for clients or whether any changes require to be made to Credo Capital Plc's execution arrangements or brokers used. In addition, Credo Capital Plc monitors the effectiveness of its Order Execution Policy and arrangements at least annually (and whenever any material changes are proposed) to identify, and where appropriate, correct any deficiencies.

(h) where applicable, an explanation of how the investment firm has used output of a consolidated tape provider.

This is not applicable, as there are currently no consolidated tape providers in Europe.
