## Fund Snapshot

- Flexible strategy drawing on Credo's equity and fixed income expertise
- Invests both directly and via collective investments
- Fixed income allocation aims to smooth volatility
- UK bias with selective international exposure
- Multi-capitalisation approach, including both small and mid-cap companies

## Objective and Philosophy

The investment objective is to provide attractive risk-adjusted returns from a combination of investments in equity and fixed income, with a bias towards UK capital markets.

The Fund has flexibility to allocate capital across asset classes depending on market conditions, adapting the investment style to complement the market cycle. The Fund Managers recognise the value in long-term compounding of returns, so aim to build a diverse portfolio of core investment holdings whilst also seeking alpha generating opportunities in under-researched areas of the market.
