

Smart dates just got smarter

Credo's in-house development team works tirelessly to improve the user experience of our platform, MyCredo.

We have enhanced the smart dates for reporting.

Various reports, including performance reports can be run in MyCredo per account or group of accounts. The smart dates below have been enhanced to include United Kingdom as well as South African Tax periods and "Since Inception".

Performance - IRR

What date should be used for your report?
